User Manual and Technical Support Documentation

September, 2022

Chapter 2. MANUAL FOR INSTRUCTORS

2.1 Getting started

- I. Make sure all the PC and System Requirements are met before moving on to the next step.
- II. Open a web browser and access DIT-elms and log in to the site/platform as explained earlier.
- III. Make sure you are logged in. If the screen shows a list of courses that looks like the one below, you are logged in to the system

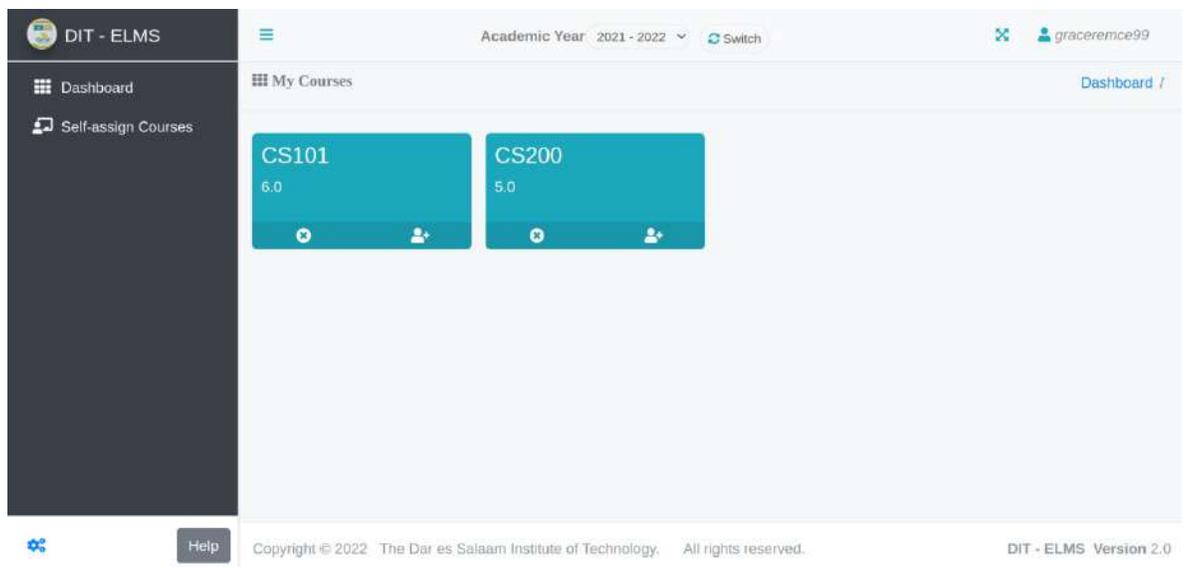

Figure 5. Instructors' home Dashboard

- IV. In the upper right you should see You are logged in as [your first name and surname] when you click to user icon, you can be able to change password and logout.
- V. If were not able to login, carefully double-check your information (username and password). If problems persist, ask for help from support staff or the system administrator.

2.2 Content creation and management

Once the instructor has clicked one of the courses listed in the courses list there will show a menu with announcements, materials, assignments, lab assignments, tutorials, external assessments, CA generator, students, quizzes, lecture room, class forum and partners.

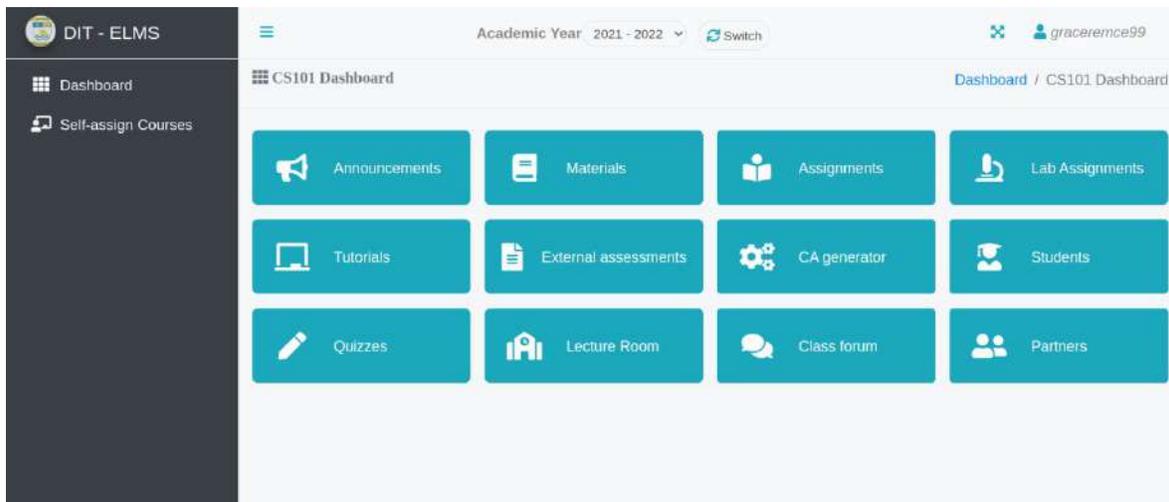

Figure 6. Module Dashboard

Figure 2.1: The page student see after click a certain module.

I. Announcements

Here the instructor can be able to see and post all announcements concerning the module. To create a new announcement, click the top right corner button (Add New Announcement) to the new advertisement associated with the module.

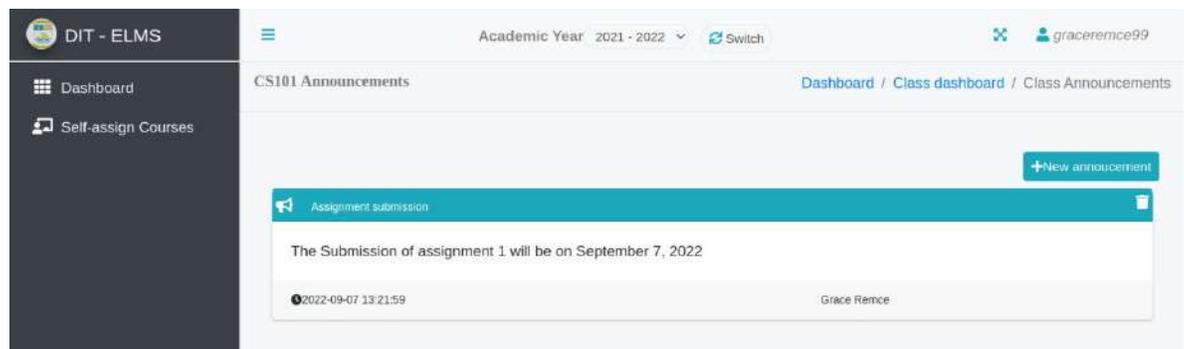

Figure 7. Announcement

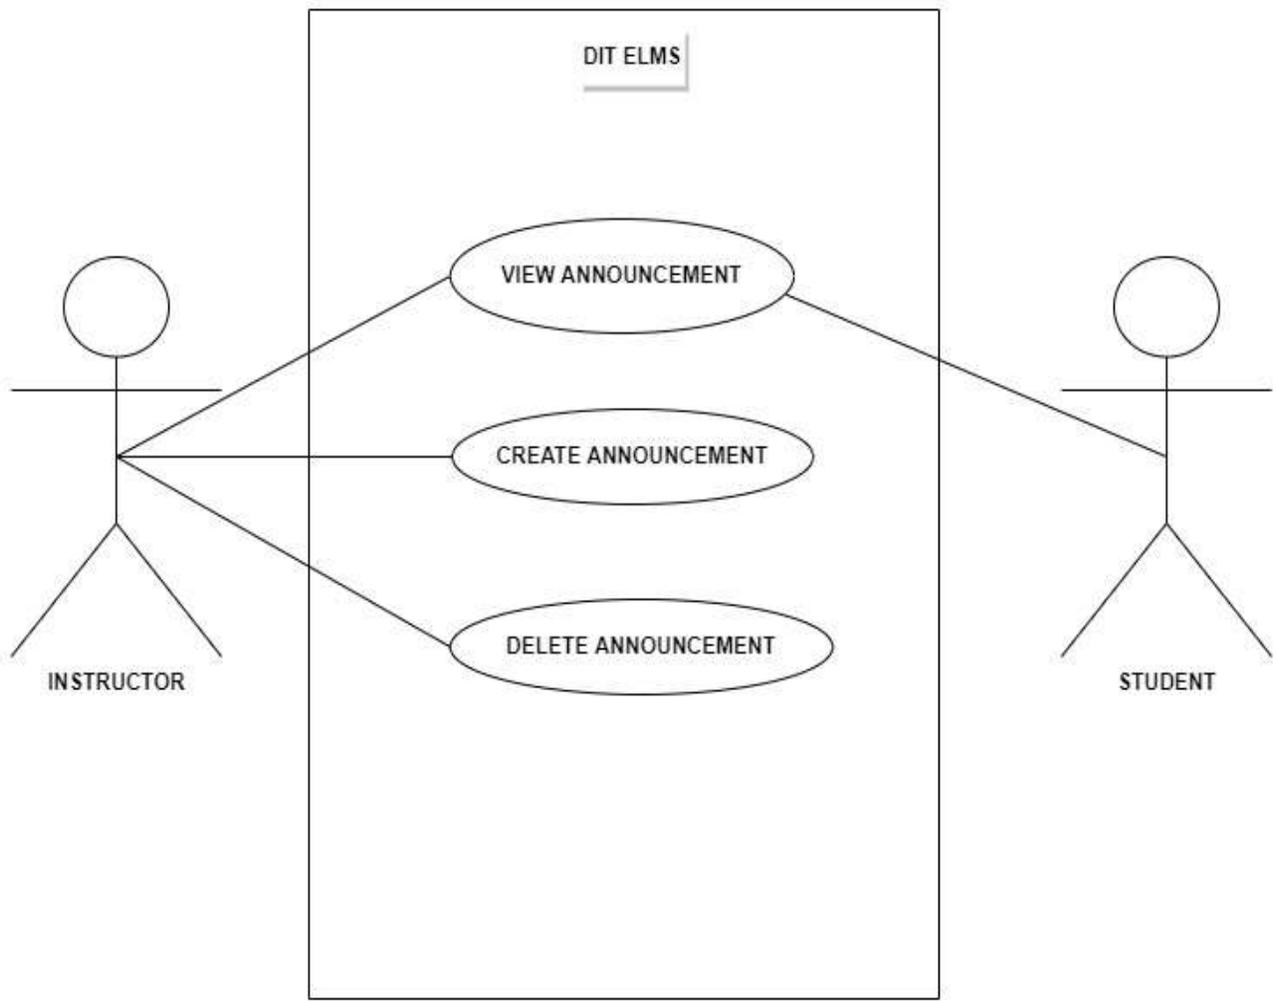

Figure 8. Use-case: Announcement

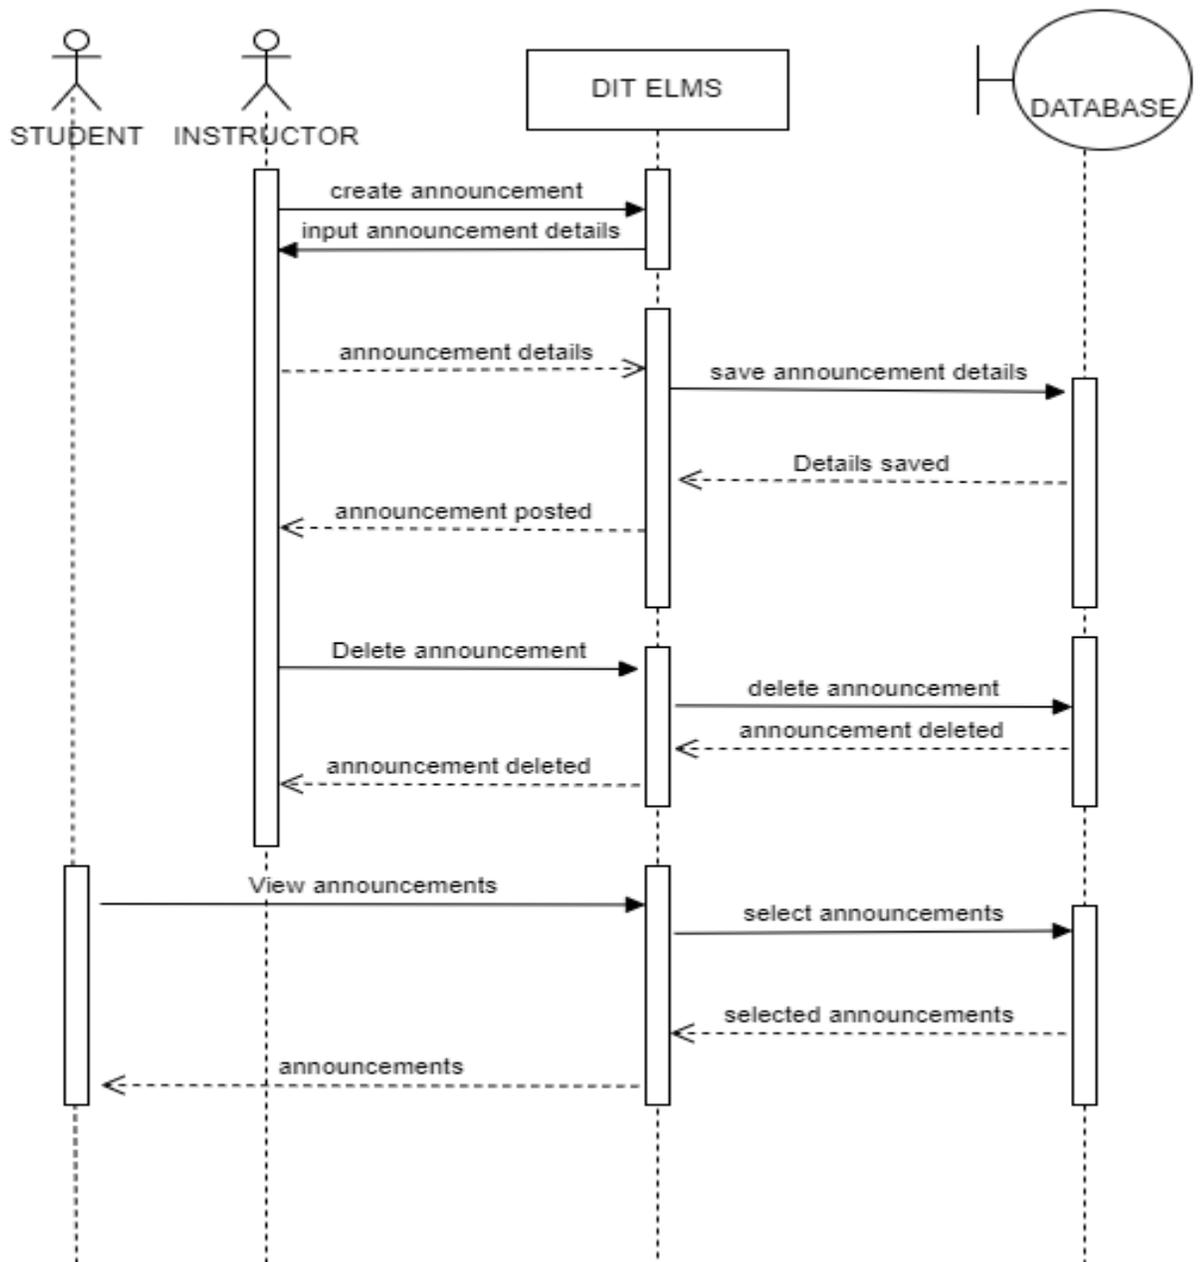

Figure 9. The sequence diagram: Flow of events on announcements

II. Materials

Here the instructor can be able to create submodules for a particular module. The instructor can be able to share link for learning materials, upload new materials such

as multimedia contents (images, videos, audio files) and textual content such as word and pdf for students to read. In order for the students to see the sub enabling, the instructor, has to publish it by clicking a button (eye icon).

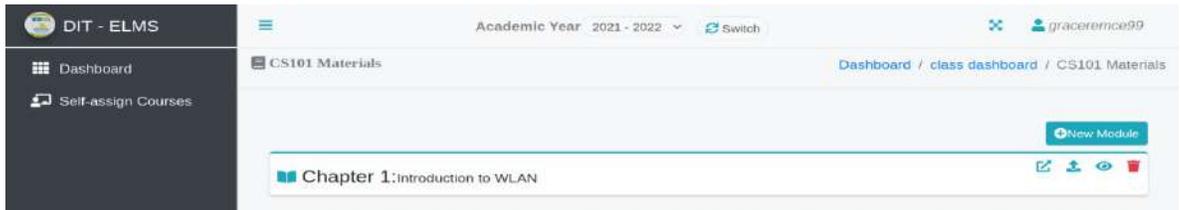

Figure 10. The page that shows the material uploaded on the platform

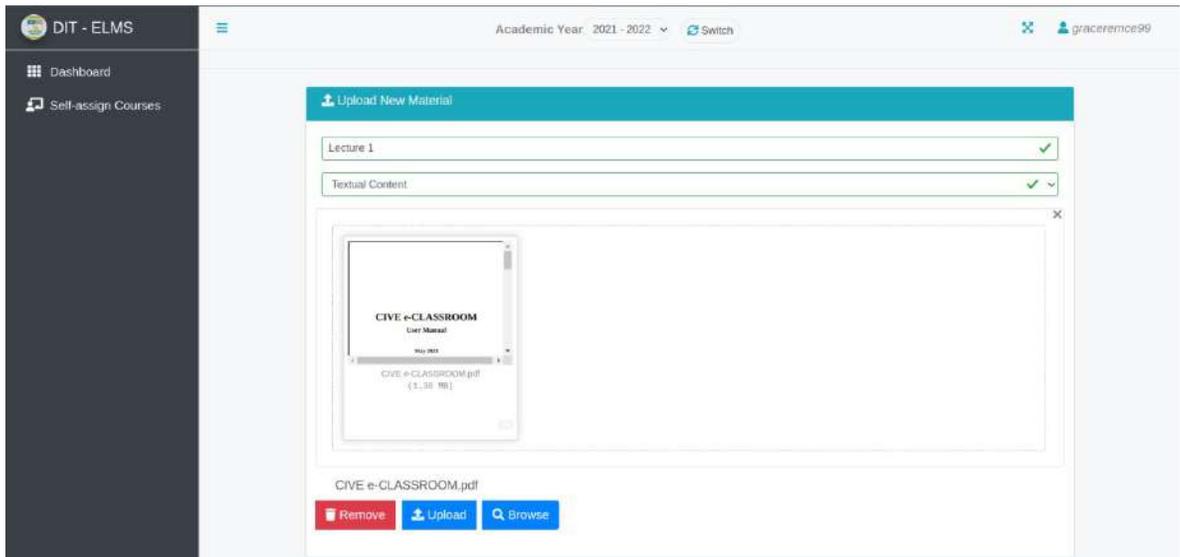

Figure 11. The page that shows how to upload material on the platform.

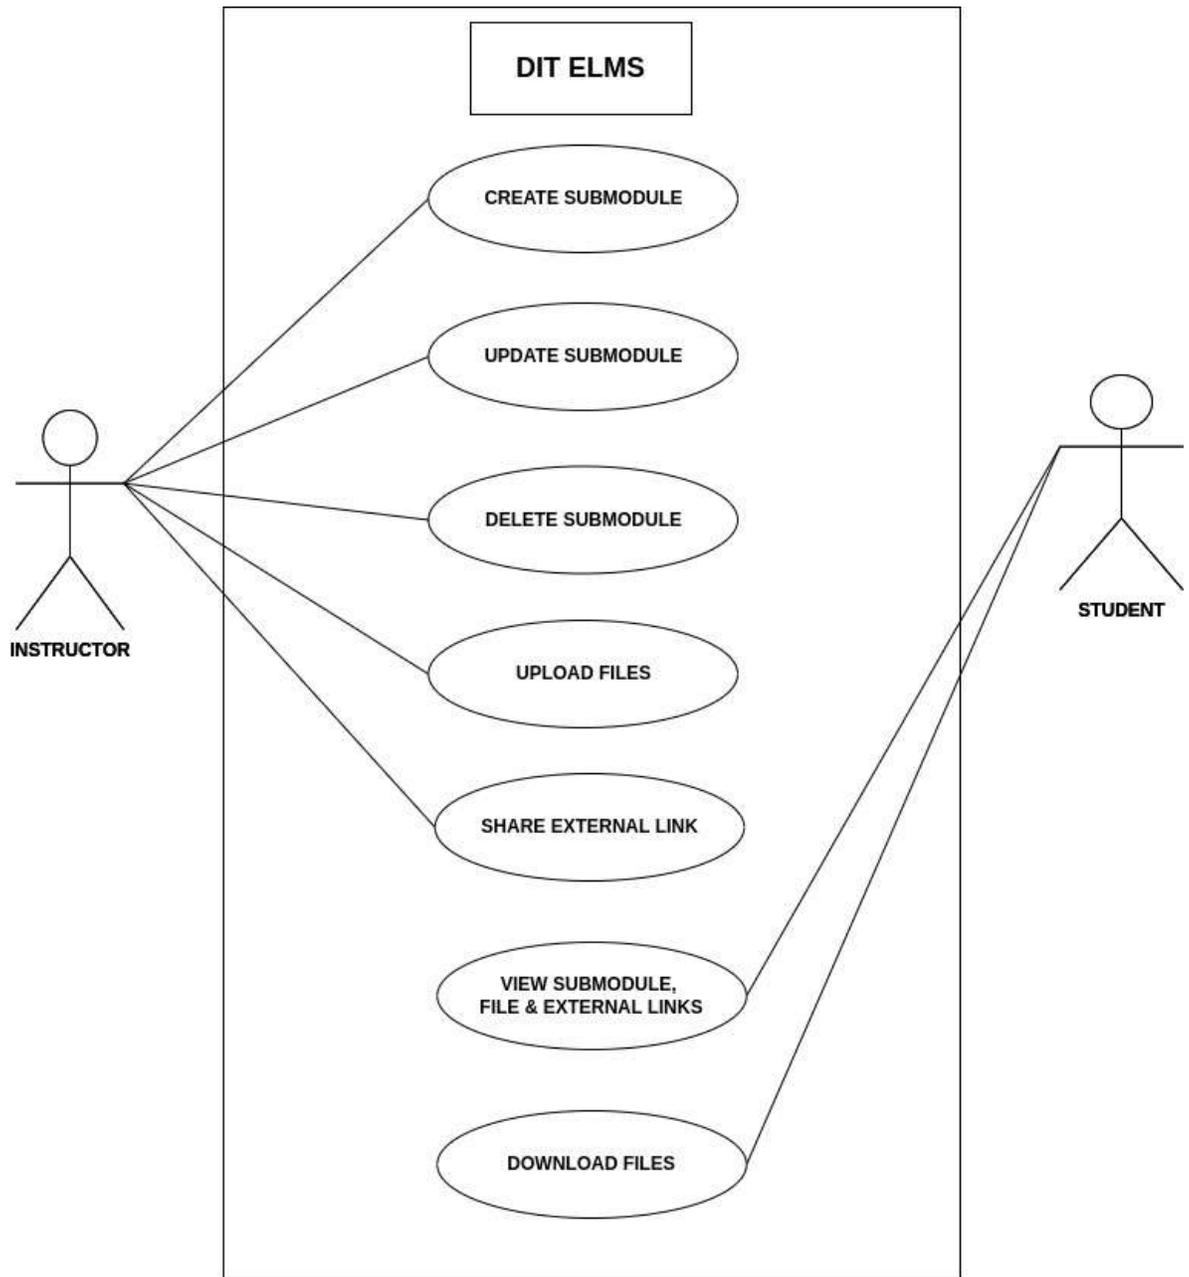

Figure 12. Use-case: Interaction between students and instructions on material sections

III. Assignments

In this section, the instructor can be able to post assignments concerning the particular module. To create an assignment, the instructor has to click (Add new assignment). In order to create new assignment the instructor has to enter assignment title, further instructions concerning the assignment, start date, start time, end date, end time, number of questions, marks for each question, and the assignment content. The instructor can be able to add assignment content by either to type the question or to upload a document with the question.

After creating the assignment, the instructor can be able to see number of submitted assignments, missing assignments, marked assignment and failed assignments. The instructor can also be able to update the assignment, download the assignment and delete the assignment.

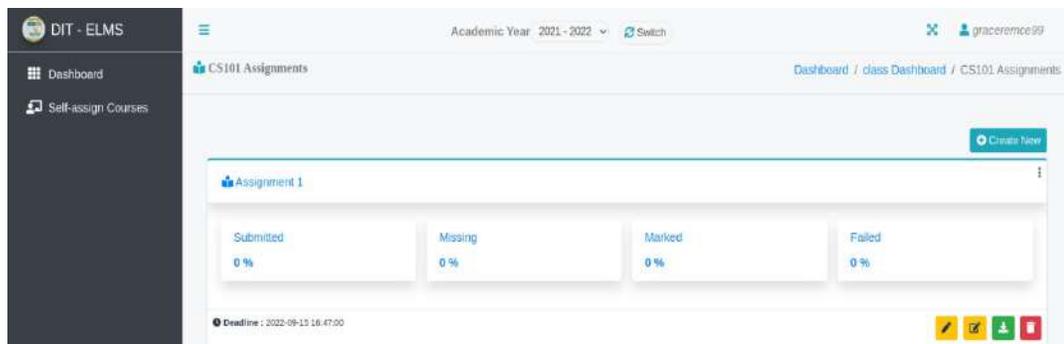

Figure 13. The page that displays the assignments created.

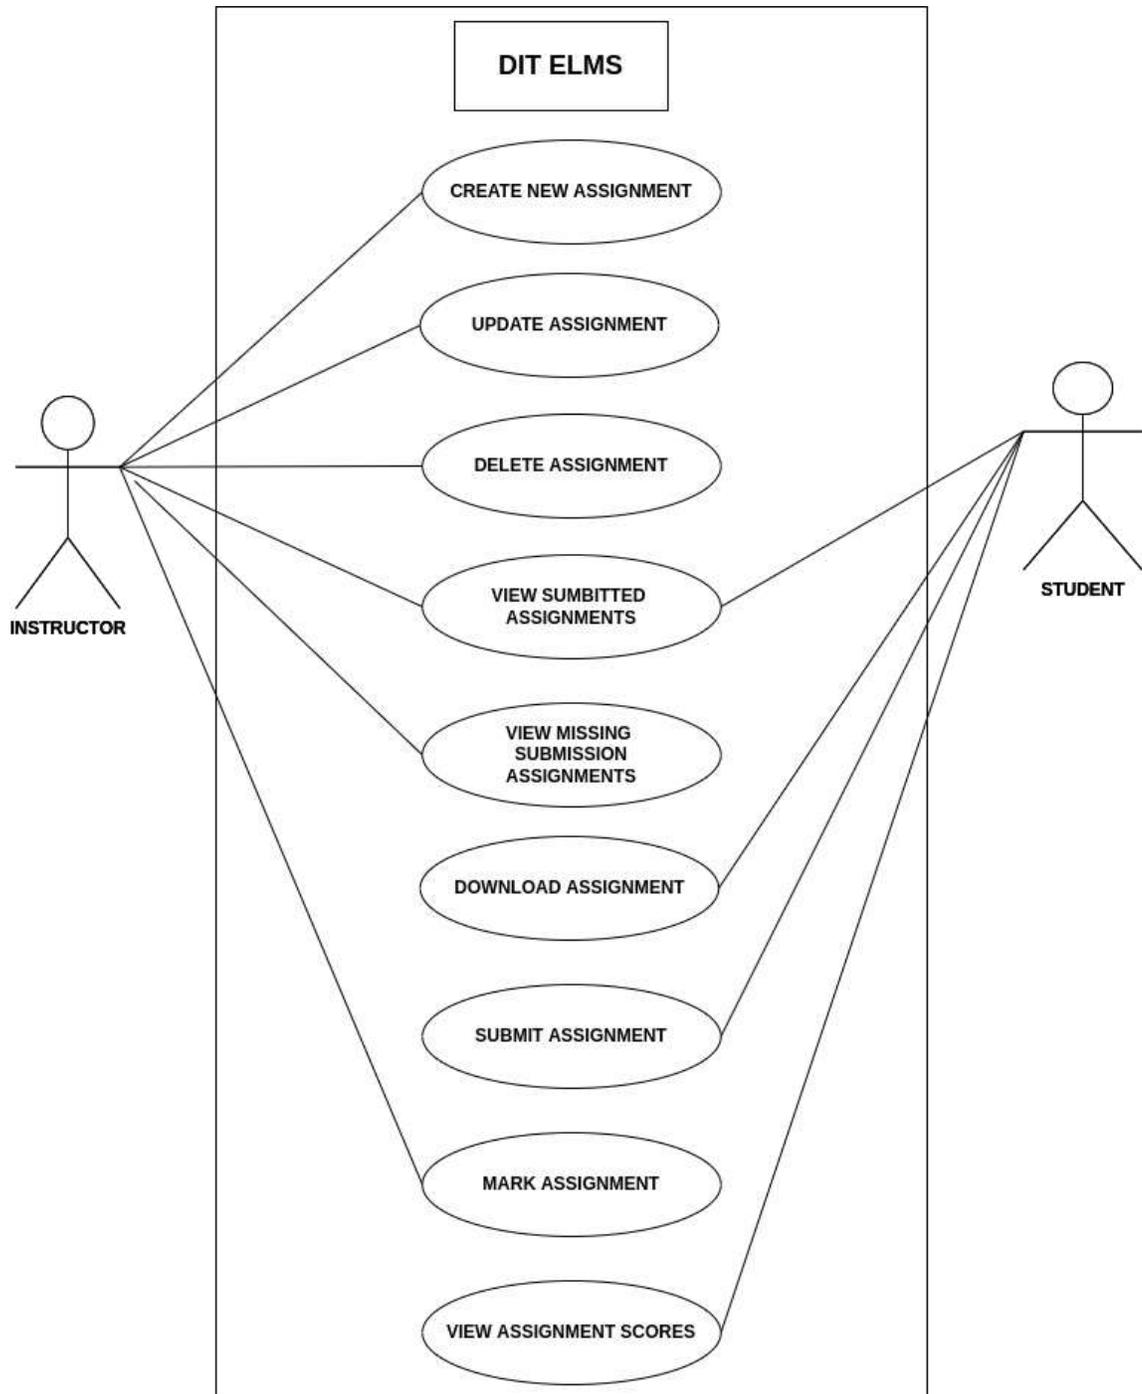

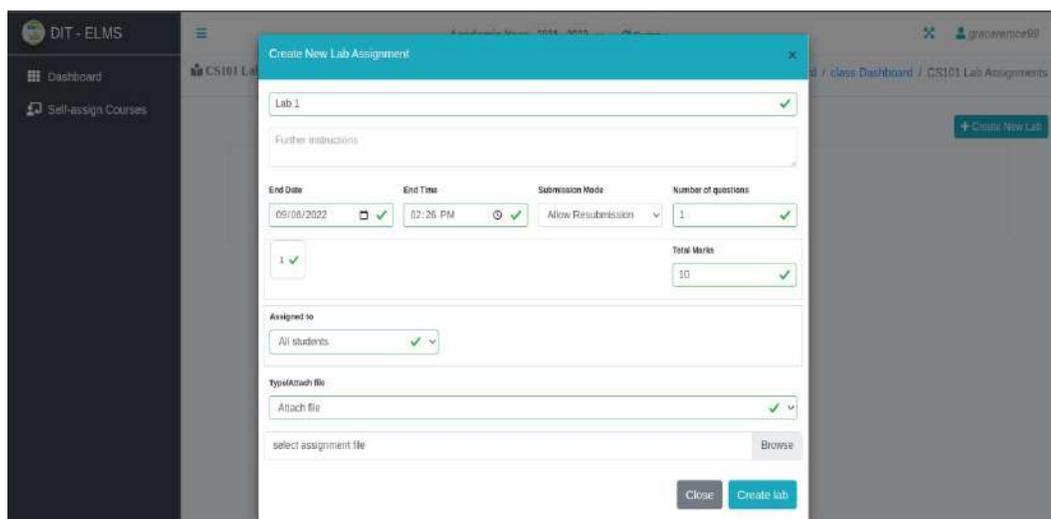

Figure 17. Use case: Interaction between instructor and students on assignment section.

IV. Lab Assignments

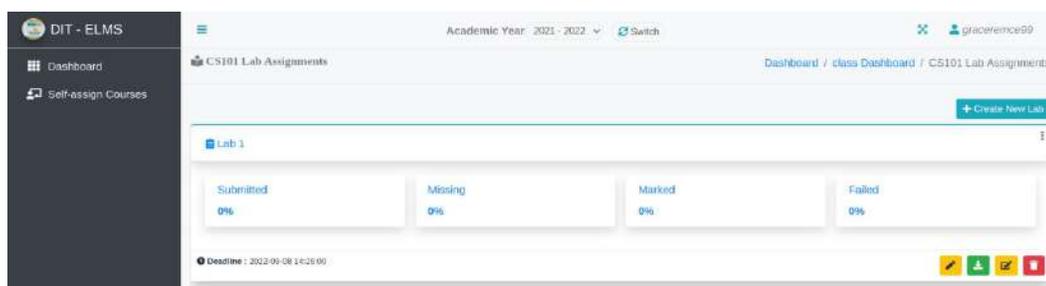

In this section, the instructor can be able to announce new lab assignments. To create a new lab assignment, the instructor has to specify lab title, instructions (if available), start date, start time, end date, end time, number of questions, total marks for each question, assign students (all students, all groups, chosen students, chosen groups) and assignment content.

The screenshot shows the 'Create New Lab Assignment' form in the DIT-ELMS system. The form is titled 'Create New Lab Assignment' and includes the following fields and options:

- Lab Title:** 'Lab 1' (with a green checkmark)
- Further instructions:** A text area for additional instructions.
- End Date:** '09/08/2022' (with a calendar icon and a green checkmark)
- End Time:** '02:26 PM' (with a clock icon and a green checkmark)
- Submission Mode:** 'Allow Resubmission' (with a dropdown arrow)
- Number of questions:** '1' (with a green checkmark)
- Total Marks:** '10' (with a green checkmark)
- Assigned to:** 'All students' (with a dropdown arrow and a green checkmark)
- Type/Attach file:** 'Attach file' (with a green checkmark)
- select assignment file:** A text input field with a 'Browse' button.
- Buttons:** 'Cancel' and 'Create lab' (in a blue box).

Figure 18. The page for creating new lab Assignment.

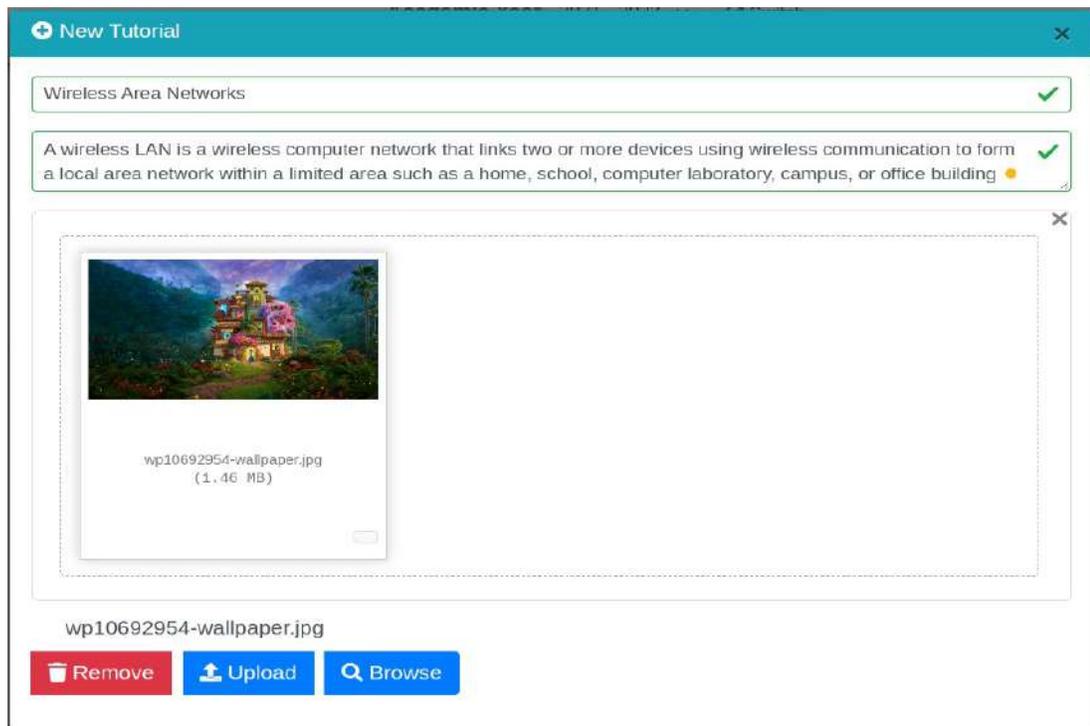

The screenshot shows the 'CS101 Lab Assignments' page in the DIT-ELMS system. The page displays a list of lab assignments with the following details:

- Lab Title:** 'Lab 1' (with a blue icon and a dropdown arrow)
- Submitted:** 0%
- Missing:** 0%
- Marked:** 0%
- Failed:** 0%
- Deadline:** 2022-09-08 14:26:00
- Buttons:** A row of four icons: a pencil (edit), a trash can (delete), a checkmark (confirm), and a red square (cancel).

Figure 19. The page shows list of lab Assignments.

V. Tutorials

In this section, the instructor can be able to create tutorial questions, video audio for the selected course. To create the new tutorial, click Add Tutorial button, then fill required information such as tutorial title, hints and attach file for tutorial (image, video, audio or document file) with respect to required file size as shown in the figure below.

The screenshot shows a web form titled "New Tutorial" with a teal header. The form contains three main sections:

- Title:** A text input field containing "Wireless Area Networks" with a green checkmark on the right.
- Hint:** A text area containing the text "A wireless LAN is a wireless computer network that links two or more devices using wireless communication to form a local area network within a limited area such as a home, school, computer laboratory, campus, or office building" with a green checkmark and a yellow warning icon on the right.
- File Upload:** A large dashed border area containing a preview of a file named "wp10692954-wallpaper.jpg" (1.46 MB). Below the preview are three buttons: "Remove" (red), "Upload" (blue), and "Browse" (blue).

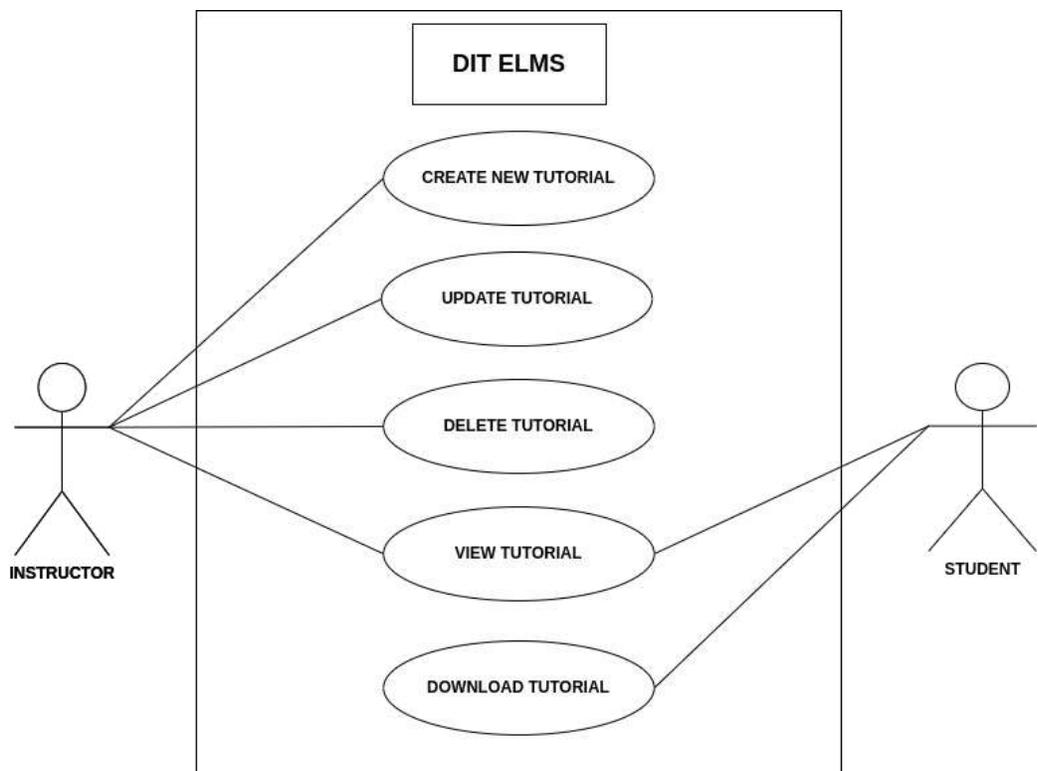

Figure 22. Use case: Interaction between students and instructor on the tutorial.

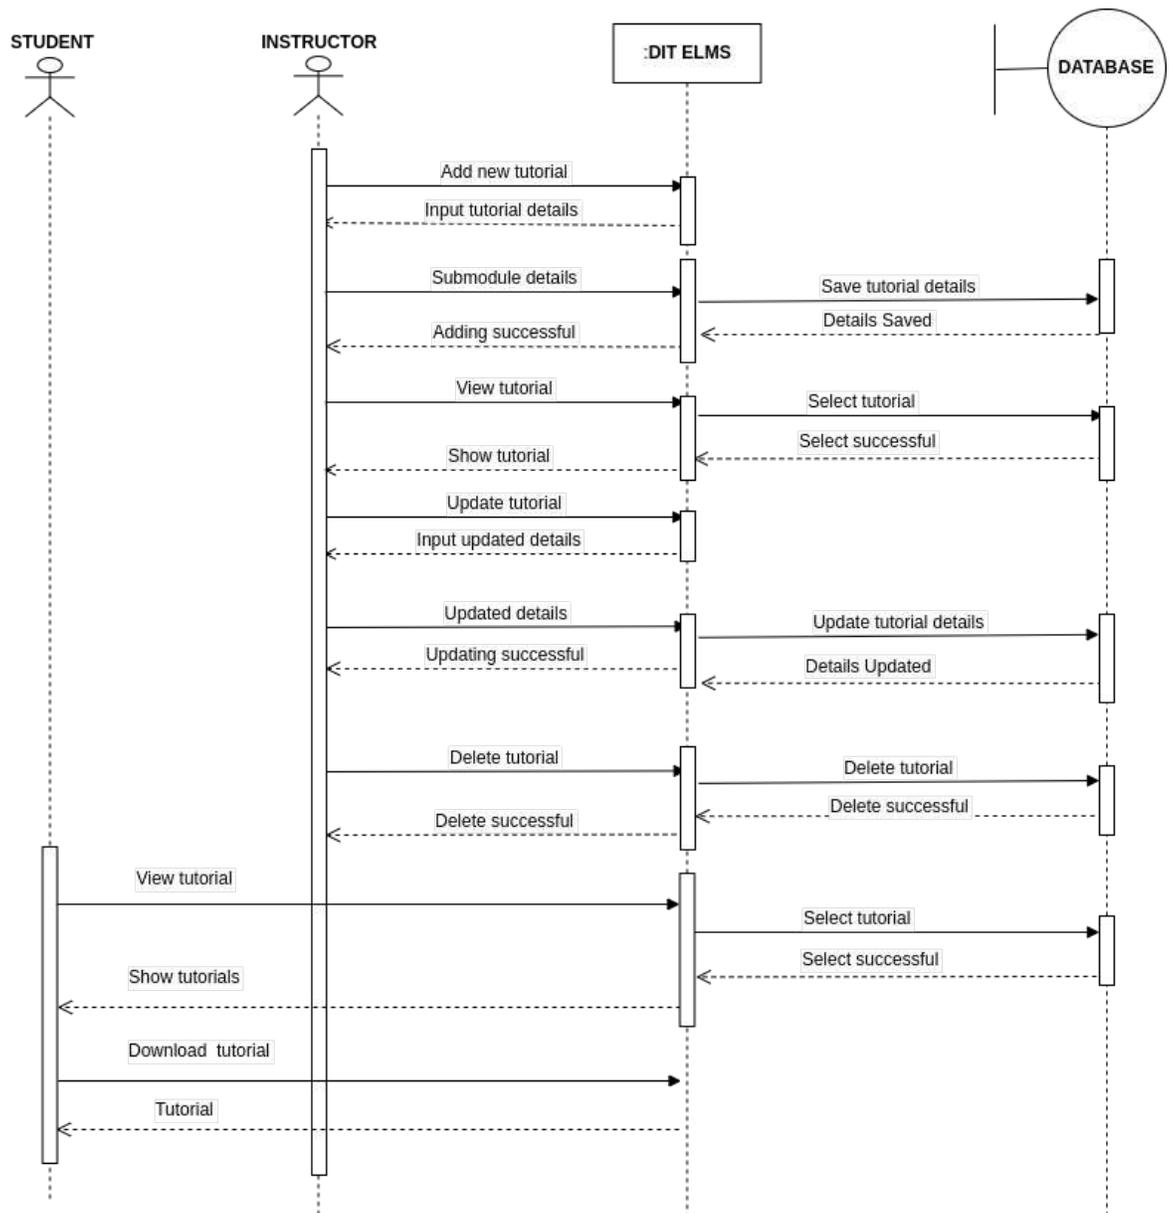

Figure 23. Sequence diagram: Tutorial management

VI. External Assessments

In this section, the instructor can be able to upload marks that were marked outside the system. Here the instructor can be able to download an excel template through which he can be able to fill student's registration number and score. This document can be uploaded to the system for further uses. To create new external assessment,

click Add New External Assessment, then fill in information such as assessment title, maximum scoring and upload excel document which contains student's registration number and score.

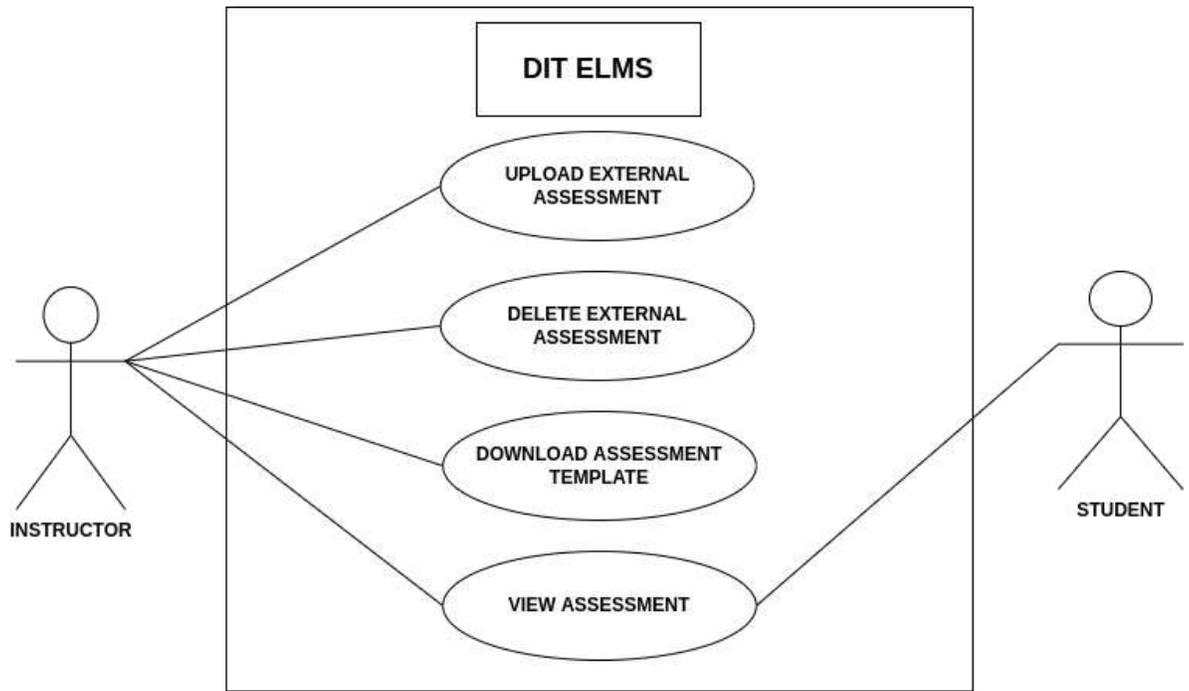

Figure 26. Use case : Interaction between instructor and student on external Assignment.

Figure 2.19:

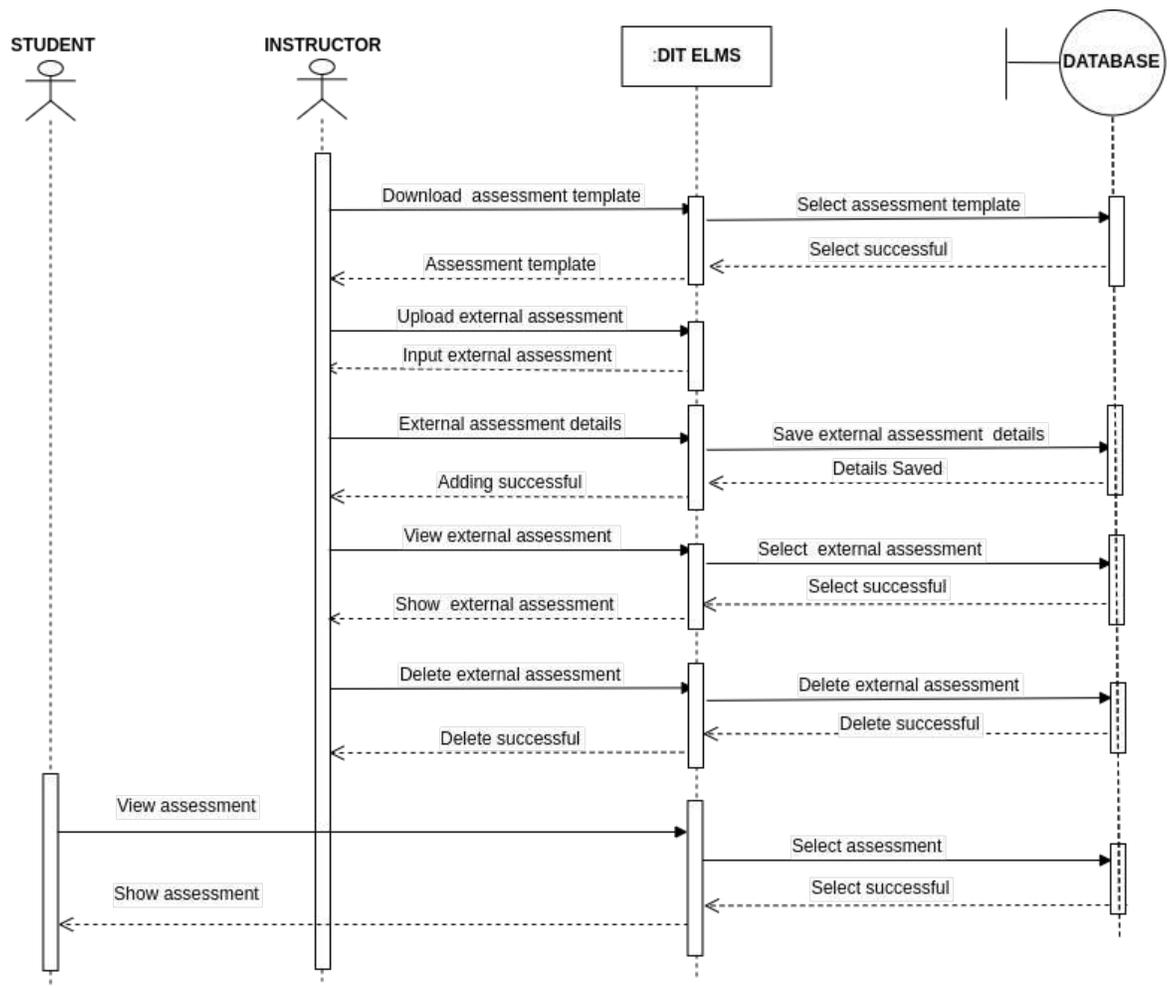

Figure 27. Sequence diagram : External assessment management

VII. Continuous Assessment (CA) Generator

In this section, the instructor can be able to generate the CA based on the submitted assignments, tutorials and uploaded external assignments. After generation of CA, there are several options the instructor can choose.

- **Save:** Here the instructor can save the generated CA.
- **Save & Publish:** Here the instructor can save the generated CA and publish it so that all students can see it.
- **Download PDF or Excel:** Here the instructor can be able to save the generated CA as excel or PDF format

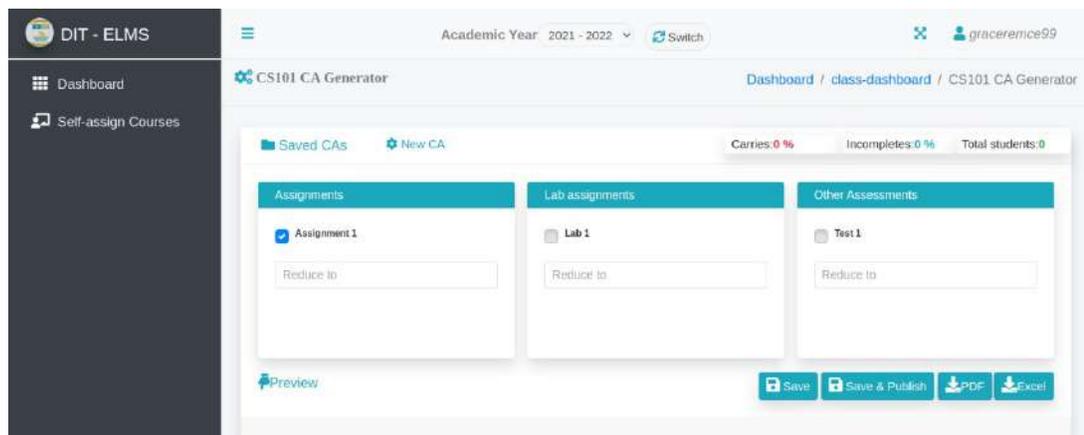

Figure 28. The page shows the CA Generator

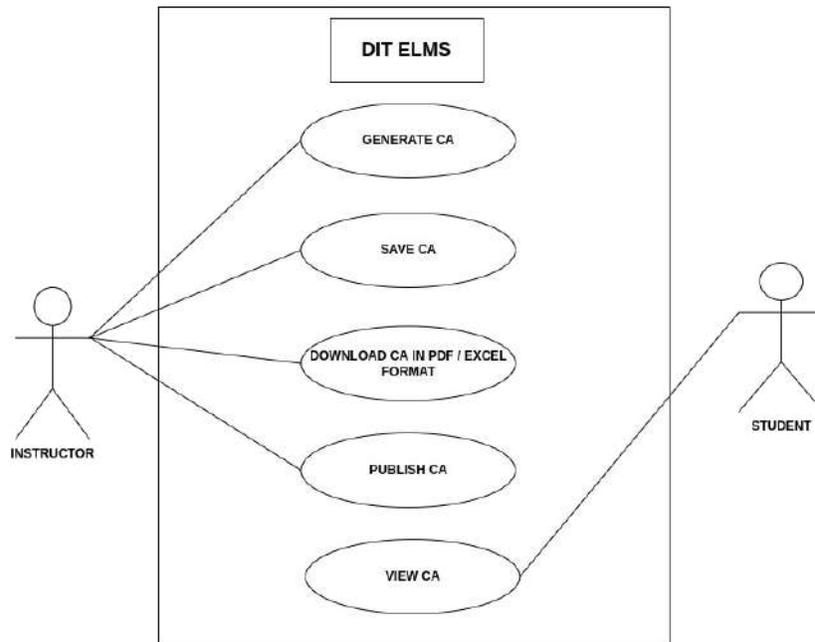

Figure 29. Use case: Interaction between student and instructor on CA Generator.

Figure 2.22:

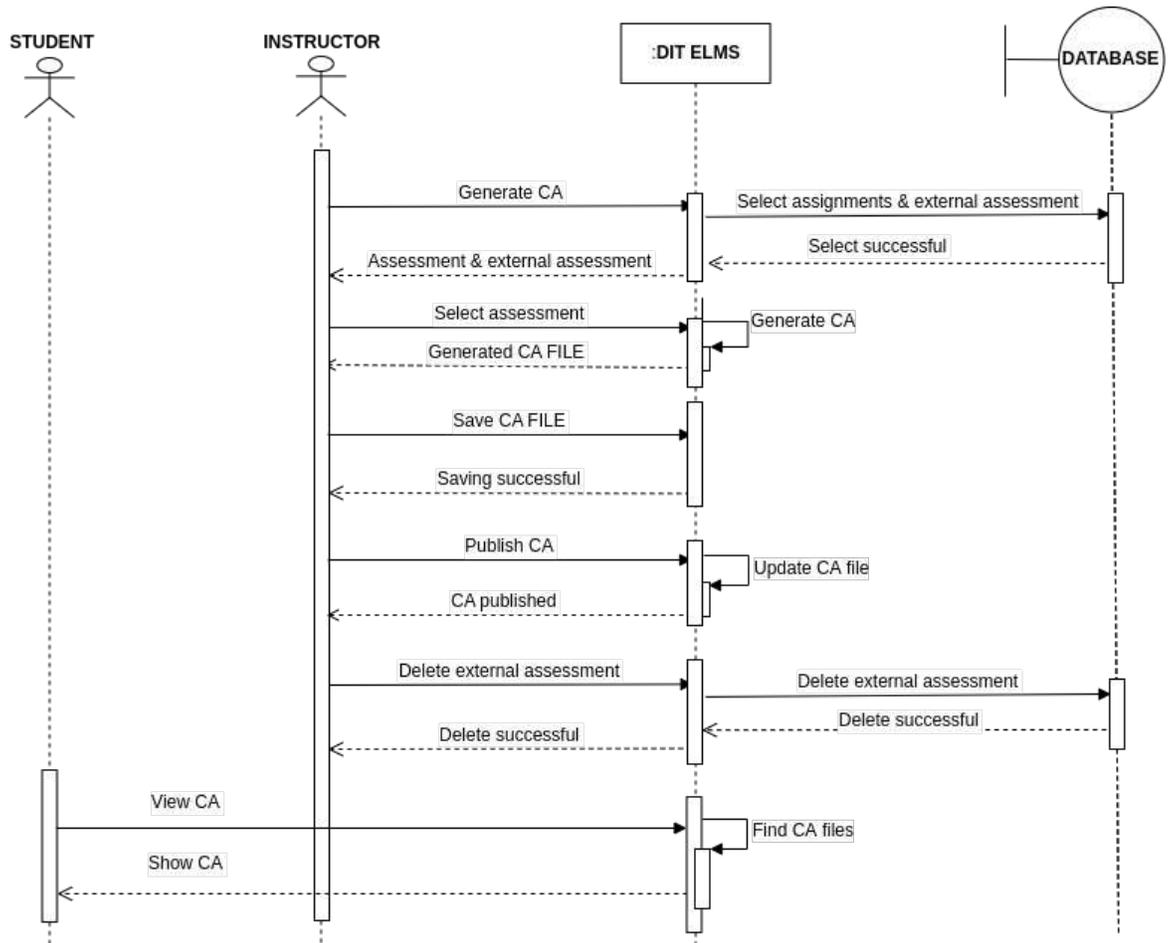

Figure 30. Sequence diagram : Continuous Assessment management

VIII. Students

In this section, the instructor can be able to see all students that are currently taking the certain module. The instructor can be able to see their registration number, program, full names, gender, phone number, education level, year of study (YOS) and status.

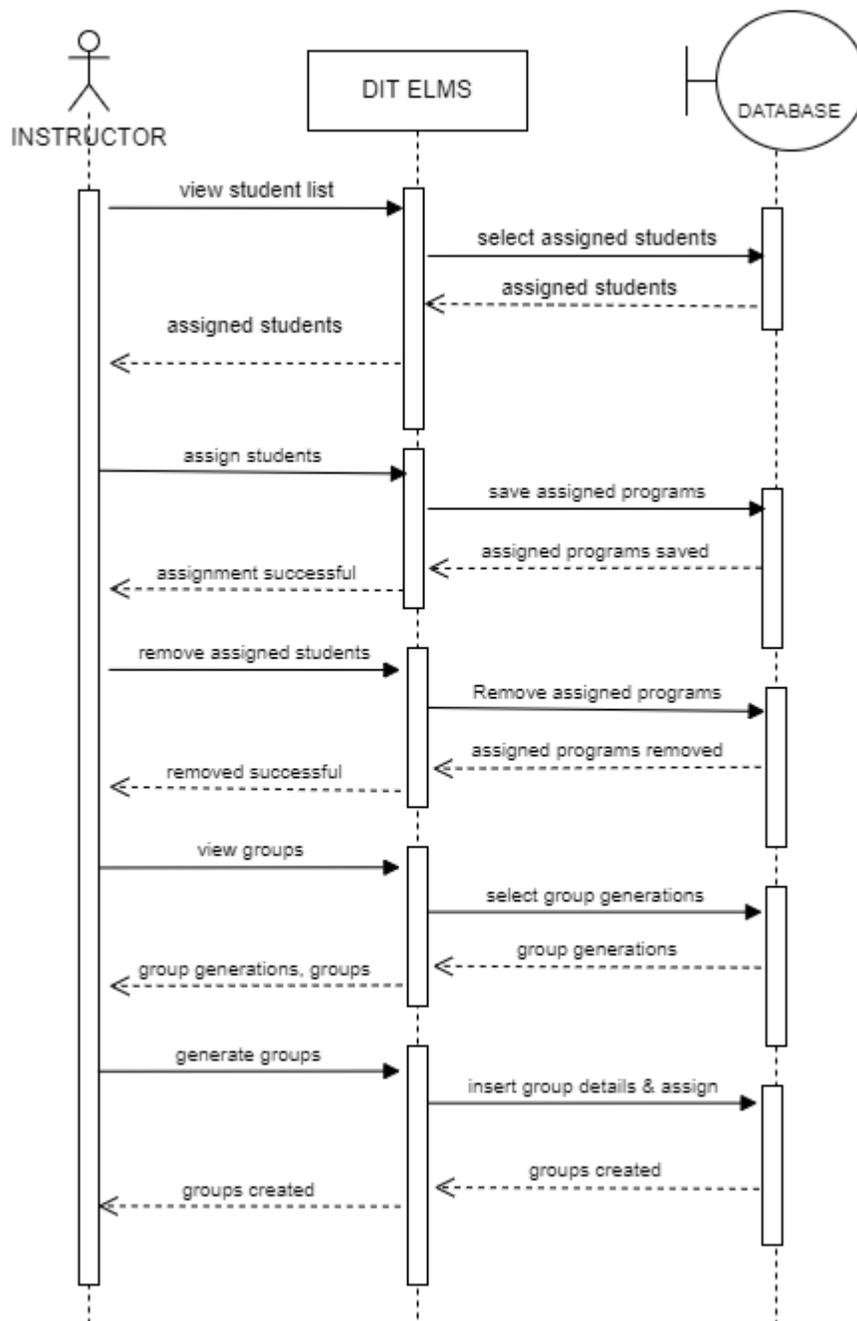

Figure 32. Sequence diagram: Students management

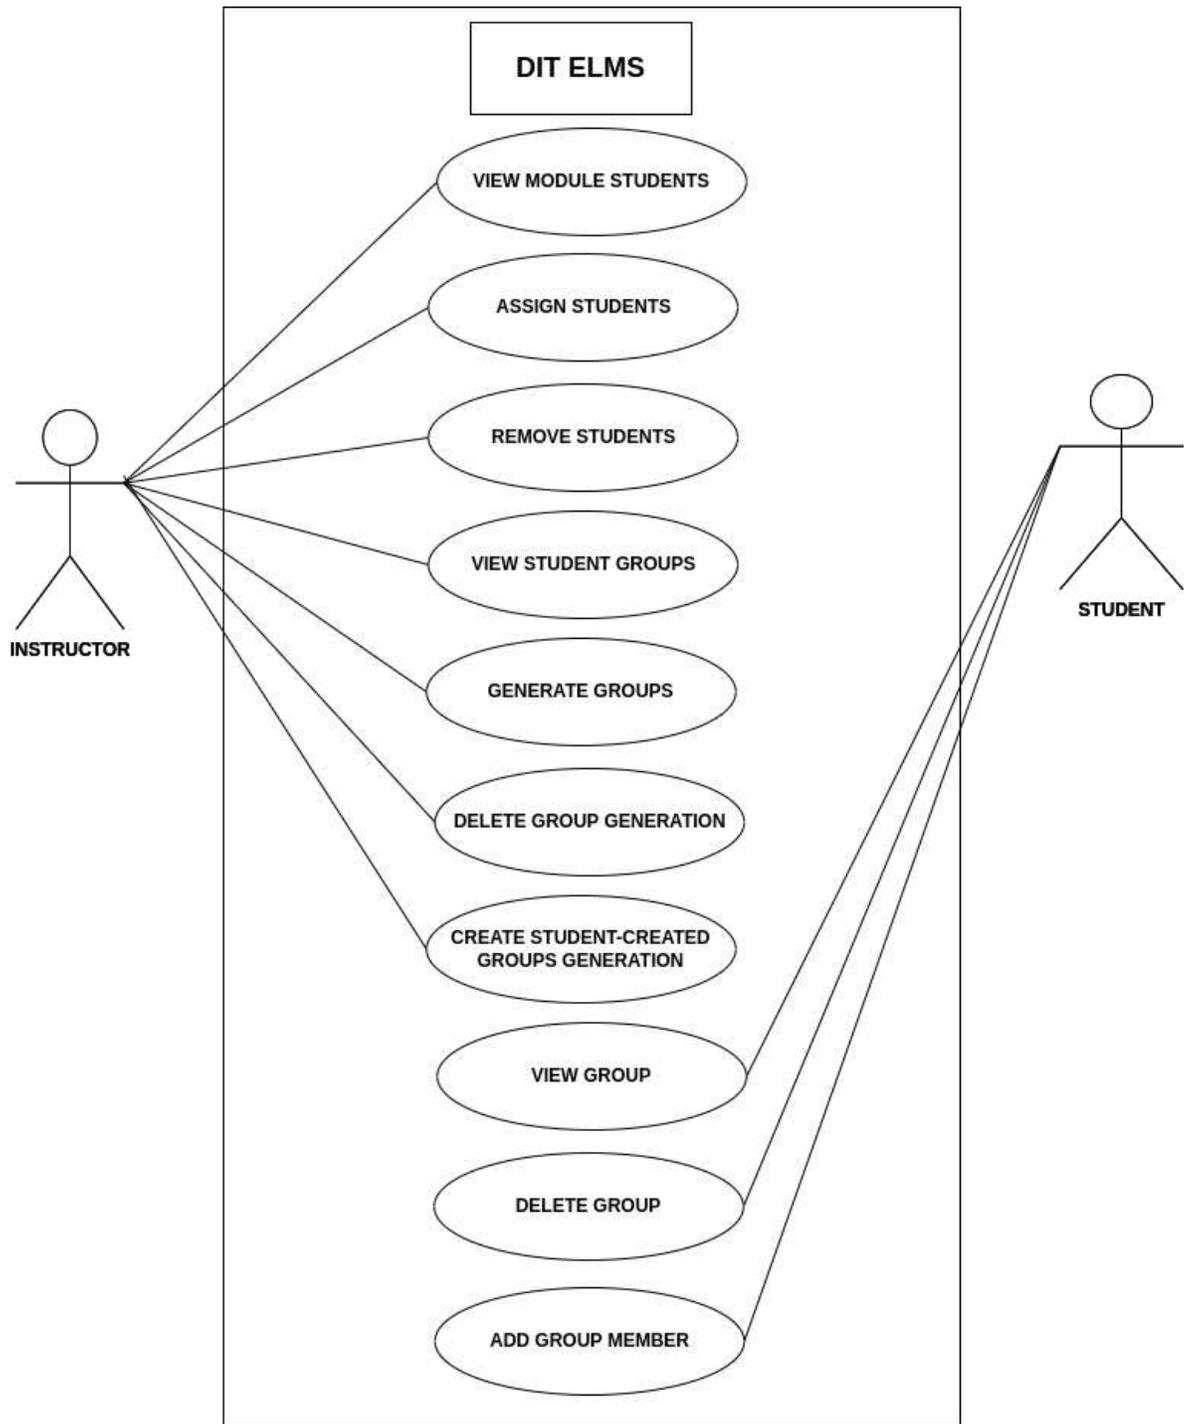

Figure 33. Use-case: Instructor course assignment

In this section the instructor can do the following actions:

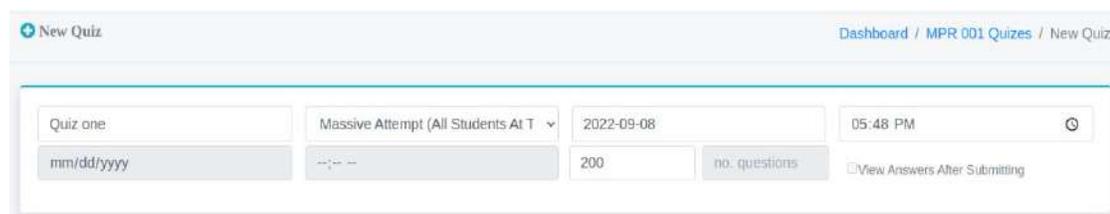

- **Assign Students:** Here the instructor can be able to choose students of a certain program to participate in the specific module.
- **Remove(Unassign) Students:** Here the instructor can choose a group of students of a certain program and remove them from participating in the module.
- **Students Groups:** Here the instructor can be able to see existing students groups, generate new groups and generate students groups type.

IX. Quizzes

In this module the instructor can be able to perform the following:

Create New Quizzes;

To create new quiz the instructor has to fill in some information such as quiz title, attempt mode, starting date, starting time, deadline date, deadline time, duration, and number of questions for the quiz.

The screenshot shows a 'New Quiz' form with the following fields and values:

Quiz one	Massive Attempt (All Students At T	2022-09-08	05:48 PM
mm/dd/yyyy	--:--	200	no. questions
<input type="checkbox"/> View Answers After Submitting			

Figure 34. New quiz creation

Upload & Download Question banks.

Here the instructor can be able to upload different questions from which he can be able to choose some of them and use them to generate quizzes for students. In this

section the instructor can also be able to add questions manually to the question bank.

The screenshot shows a web interface for creating a new question. At the top, there is a teal header with a plus icon and the text "Add New Question" and a close icon. Below the header is a dropdown menu set to "Multiple Choices". The main area contains a question text box with the text "What is a mobile application?" and a green refresh icon. Below the question are four choice boxes, each with a trash icon, a plus icon, and a checkbox. The choices are: "Just an app", "A mobile phone", "A mobile application or app", and "I dont know". At the bottom left, there is a checkbox labeled "Accept More Than One Correct Answer" which is currently unchecked. At the bottom right, there is a "Save" button with a floppy disk icon.

Figure 35. New quiz creation 1

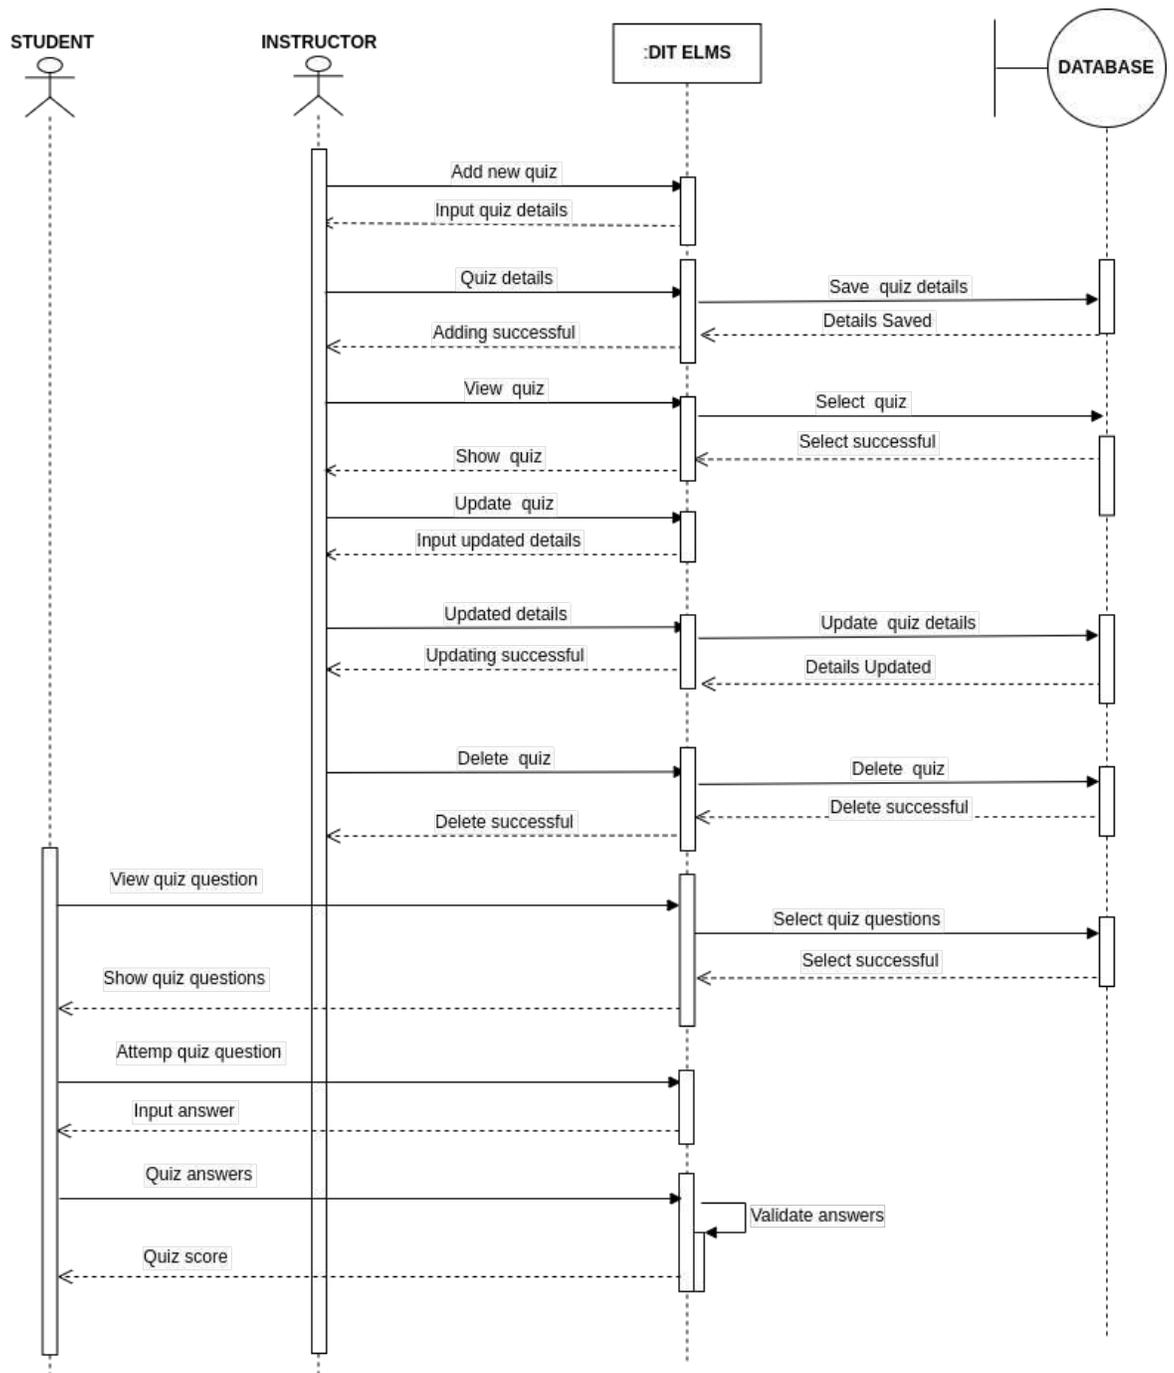

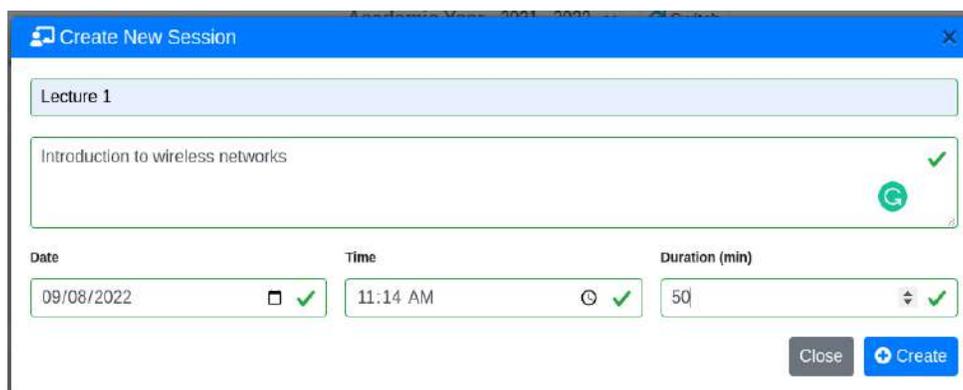

Figure 37. Sequence diagram: Quizzes

X. Lecture Room

In this section, the instructor can be able to provide lecture to the students. Here the instructor can be able to perform the following functions;

- **Schedule Sessions:** Here the instructor can be able to create new sessions by providing details such as session title, session description, date, time and duration.

The screenshot shows a 'Create New Session' dialog box with the following fields and values:

- Title: Lecture 1
- Description: Introduction to wireless networks
- Date: 09/08/2022
- Time: 11:14 AM
- Duration (min): 50

Buttons: Close, Create

Figure 38.new Session creation

After creating the session, the system will provide the instructor the capability to manage the session created. The instructor can be able to provide lecture through live streaming. To start session, the instructor has to click Start Session button then choose appropriate session, then the system will take the instructor to the live streaming service through which students will be able to participate.

- **View recorded sessions:** Here the instructor can be able to see all the recordings he performed during live session. The system will enable the instructor to play back the recorded session though live streaming service integrated to the system.

Figure 39. View recorded sessions

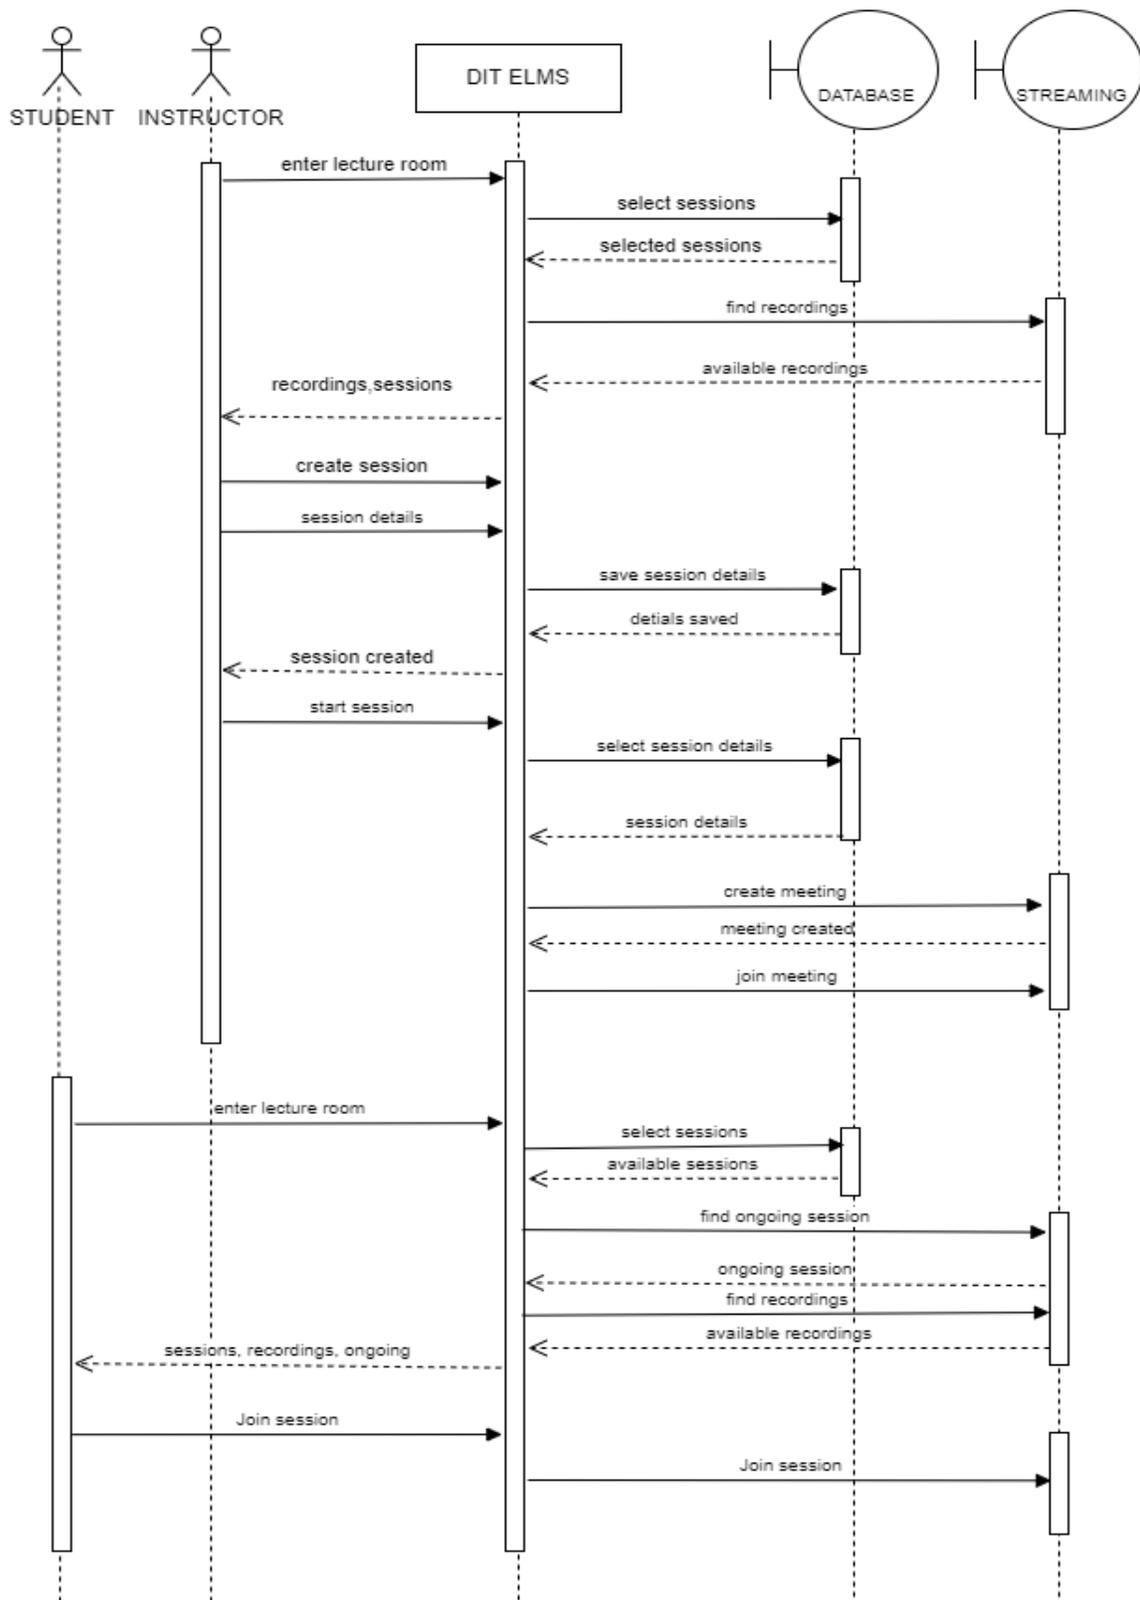

Figure 40. Sequence diagram: View recorded sessions

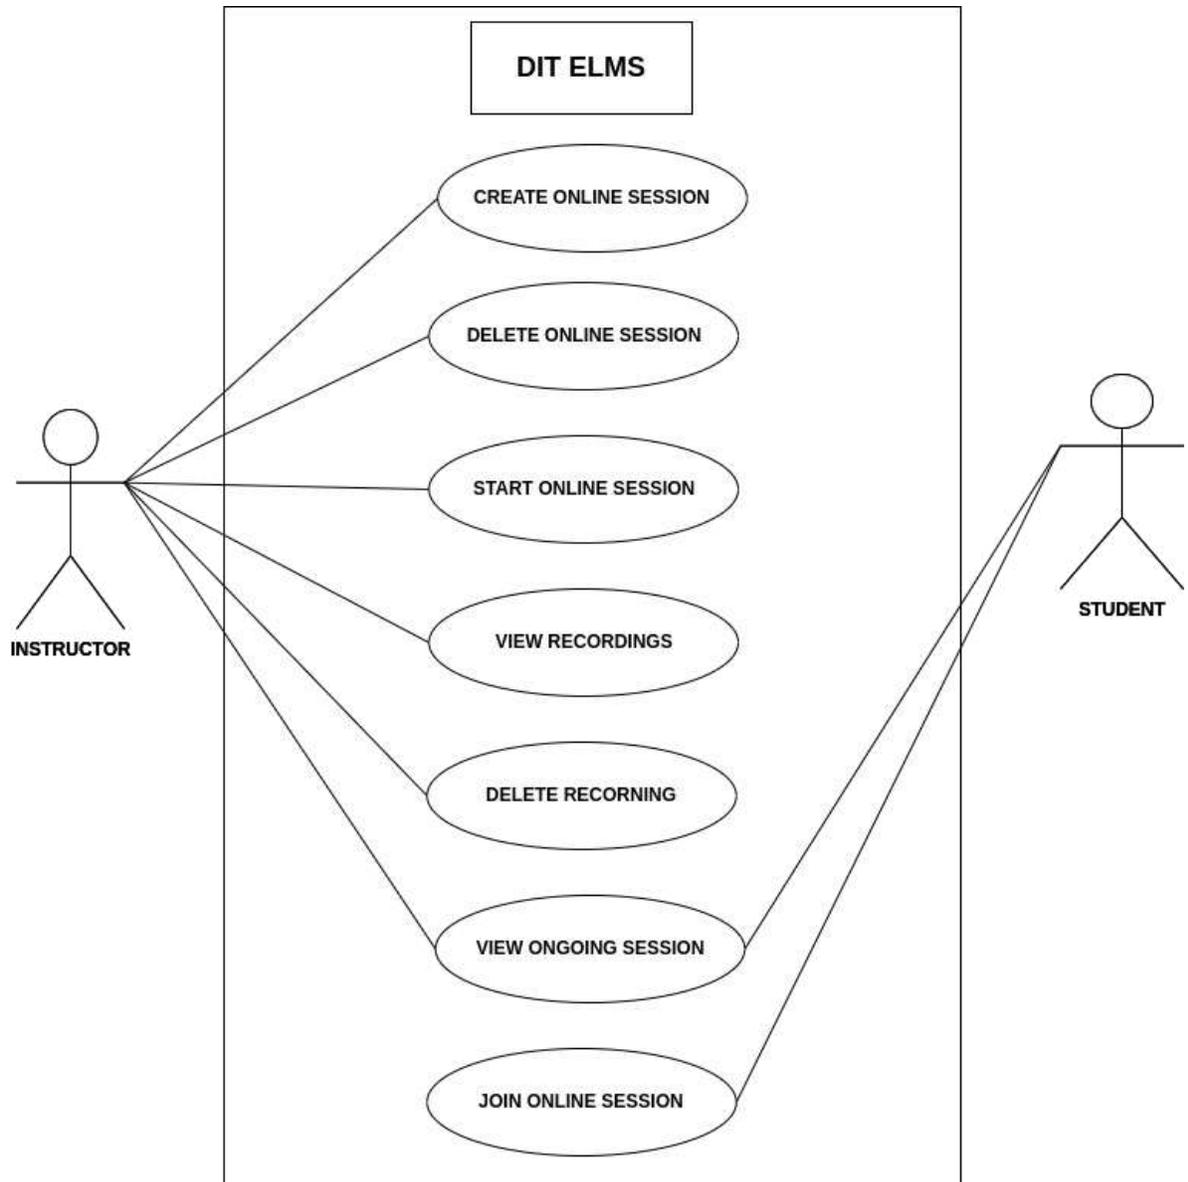

Figure 41. use case: interaction between instructors and students on lecture room.

XI. Class Forum

In this module, the instructor and the students can be able to discuss different issues. The instructor or the student can be able to post questions and all members of the particular class can be able to participate through comments. It gives a room for students to ask questions and the instructor to provide a descriptive explanations concerning the subject at hand.

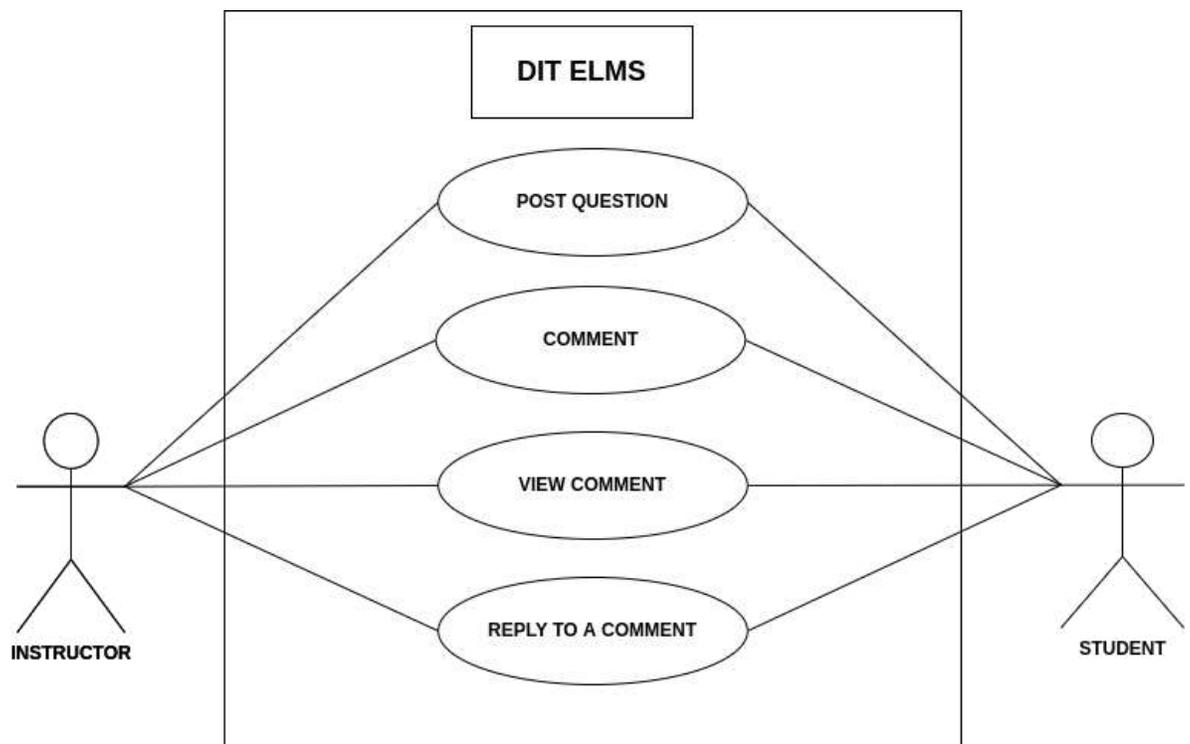

Figure 42. use case : Instructors and students on class forum.

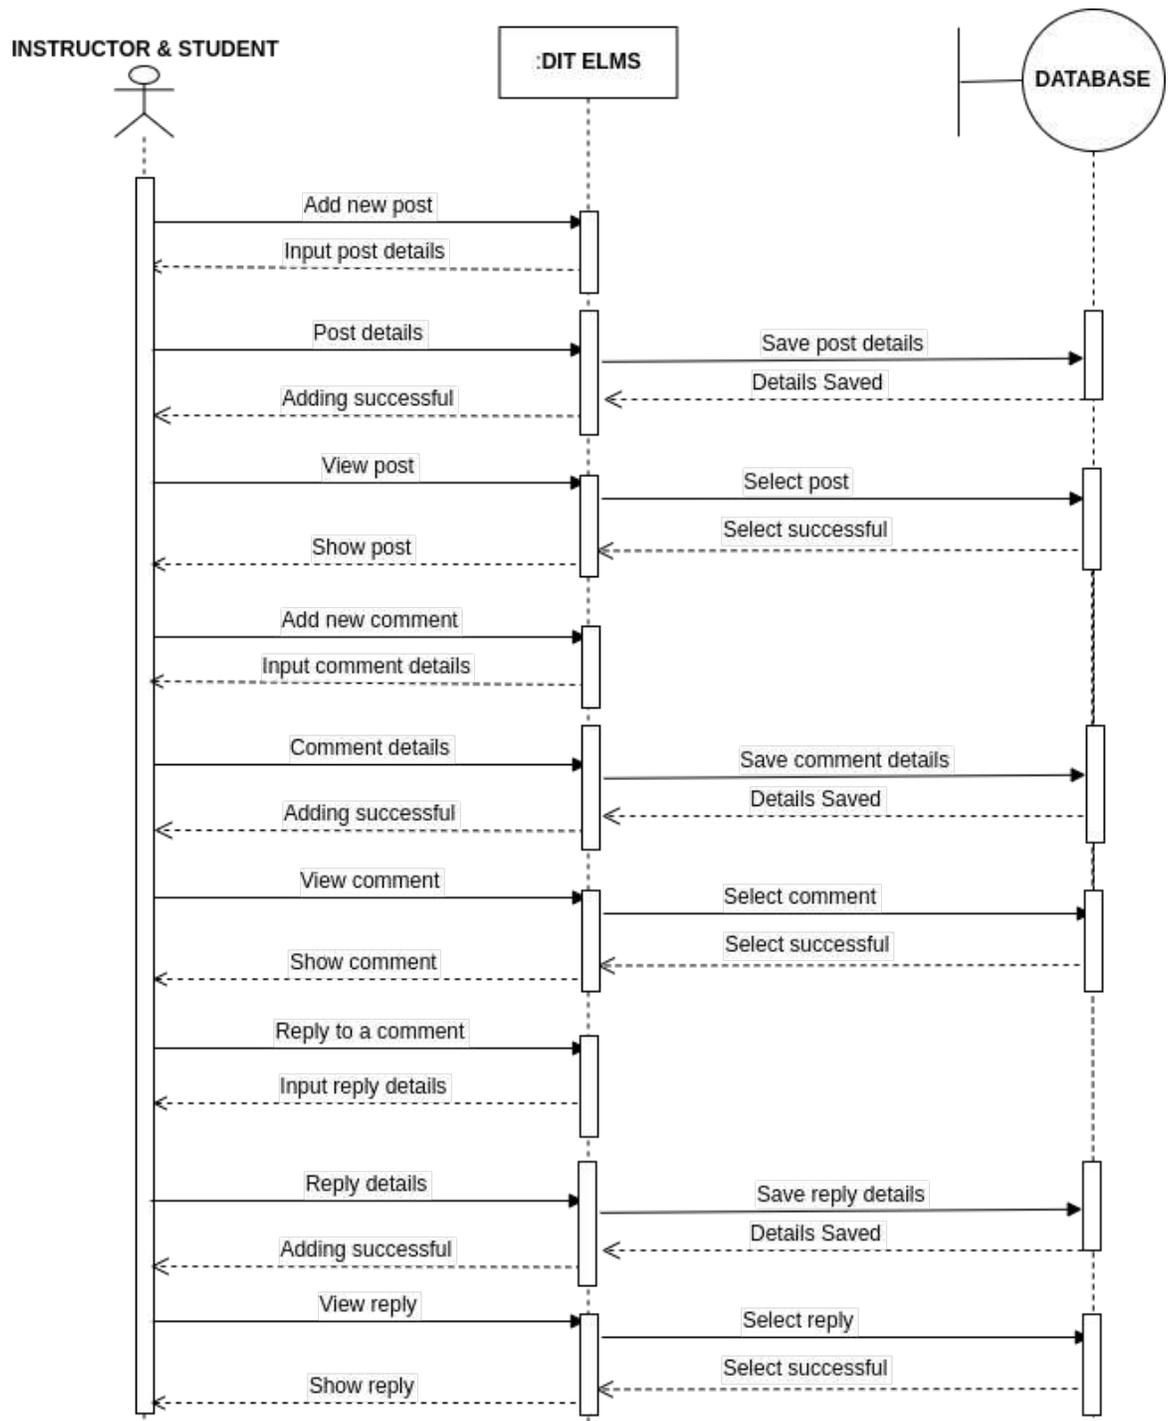

Figure 43. Sequence diagram: Class Forum

XII. Partners

In this module, the instructor can be able to add and see new partners that are currently collaborating in teaching the specific module. To add new partner, the instructor has to choose one of available instructors and click Add New button.
